SUMMARY

Backend Engineer with 6+ years building Java and Spring Boot services for payments and banking, across 20+ production services at up to 5K requests per second. Pairs API and data design with hands-on AWS delivery, most recently leading the move of a monolith to event-driven services.

EXPERIENCE

Senior Backend Engineer – *Acme Payments* Jan. 2023 – Present | London, UK

- Cut checkout API p99 latency from 800ms to 250ms by replacing N+1 JPA queries with batched fetches and a Redis cache
- Led the split of the billing monolith into 6 Spring Boot services on Kafka, owning the design and rollout plan
- Mentor 3 engineers and run the team's weekly design review

Software Engineer – *Globex Bank* Jun. 2019 – Dec. 2022 | Manchester, UK

- Built the customer onboarding API in Java 17 and PostgreSQL, used by the web and mobile apps
- Reduced failed deployments by 70% by introducing contract tests and a GitHub Actions pipeline
- Wrote the team's runbooks for incident response and on-call handover

SKILLS

Languages: Java, SQL, Python, Bash

Frameworks: Spring Boot, Spring Security, Hibernate/JPA, JUnit, Testcontainers

Infrastructure: AWS, Docker, Kubernetes, Kafka, PostgreSQL, Redis, GitHub Actions

EDUCATION

B.Sc. in Computer Science – *University of Leeds*

2015 – 2019 | Leeds, UK
